WORK EXPERIENCES

SDET - WEB PLATFORM

Hilton (Contract) | Remote | Typescript
March 2024 - Present

- Develop and maintain Cypress test across several applications and use cases in accordance to QE and development team standards
- Implemented a test framework with live data while maintaining over 99% reliability
- Collaborated with multiple Hilton teams to understand testing and data needs, then built a Cypress and Playwright monorepo to automate API testing and generate test data via CI with scheduled runs.
- Contribute to UI team sprints by addressing UI development tickets as time allowed
- Participate in and contribute to scrum and agile ceremonies across 3 main teams.

QA ANALYST

Elm Street Technology | Eugene, Oregon + Remote | Typescript Javascript
Jan 2022 - March 2024

- Perform manual functional, smoke, and regression testing
- Identify and report bugs and issues
- Design and develop test plans and test reports for stakeholders
- Present product demos of new features and application changes to stakeholders
- Develop automated end-to-end tests using Playwright and Cypress across multiple applications
- Assist with on-boarding new hires and contractors brought onto the QA team

DEVELOPER PARTNER SUPPORT ASSOCIATE

IDX Broker | Eugene, Oregon | HTML CSS Javascript
Jun 2020 - Jan 2022

- Provide technical support to developers partnering with IDX Broker
- Assists with client customized Twig language templates.
- Share information regarding our REST API, platform-specific use, and serve as an intermediary between the Product team and customers
- Recruit and onboard new partners and partner organizations
- Assist with on-boarding new hires for several teams
